WHILE the political outlook in Europe cannot be regarded with complacency and there seems only too much ground for the fear that sooner or later the match may be - applied which will set the highly combustible materials on that Continent in a blaze, it is worthy of note that one at least. of Her Majesty's Ministers feels at liberty to assume a cheerful tone so far as British foreign relations are concerned. At the Mansion House banquet, on the 9th ult., Lord KIMBERLEY, Secretary of State for India, said the relations of the British Government with foreign Powers were friendly and cordial. After announcing the conspicuous success of the Mission of Sir MORTIMER DURAND to Afghanistan, his lordship went on to add:-"We have also "to conduct negotiations with a great " European Power-with Russia-upon that "frontier, and I believe that the friendly " negotiations which are going on with Russia e permanent settlement of our dispute with "her on that frontier. developed the existence of a very general belief that there will be an effort next year, possibly early in the year, to bring about another international conference for the purpose of securing some recognition of silver. A prominent member of the Senate Committee on Finance, who has been known for many years' for his hostility to the continued use of silver in

this country without the co-operation of the principal European nations, expressed an opinion to-day that by proper management the Administration could secure a conference upon the question, which would accomplish important results, looking to the largely increased use of silver in European countries. ENCYCLICAL ON THE SCRIPTURES. Rome 29th November. The Pope has issued another encyclical. It is in three parts. The first part deals with the expounding of the Scriptures. It recommends that preachers study the secred books and the history and records of these books, giving examples of the pressing of Jesus and the apostles and the fathers of the church. They second part refers to the method of teaching and tudy, and contains instructions to theologians, prescribing the study of the ancient languages, especially the Semitio. The third is the most important. In it the Pope points out fallacious errors in the systems of interpretation of the Scriptures; dwells upon the necessity of the authority of the church in this respect and affirms the authority of the Councils of Trent and Florence and of the Vatican, and the divine inspiration of all parts of the Scriptures. It warns against the spirit of rationalistic criticism and tendency to give pr ference to scientific theories, and concludes that on points where science seems opposed to the Scriptures it must be supposed that either the Scriptures ere badly interpreted or that the scientific

reasoning is erroneous. CATHOLIOS COSSACKED. BERL N. 23th Novamber.

of Macriven & Cameron are recommended by FIHE object of the Company is to form and maintain a Factory in Yokohama for the Manufacture of Watches of all kinds and de-

For this purpose it is proposed to purchase a site within the limits of the Foreign Settlement of Yokohama and thereon to erect the Factory. The founders of the Company are possessed

of a plant of machinery complete in every particular, of the nawest design and the finest workmanship, and adapted for the making of all implements used in the watch trade, as well as EMIRST and Highest Prize the making of walches. It is well known that No. 2." "V. S. No. 3," and the water trade, and it is confidently expected that by availing itself of the comparatively the world payable at any of its Agencies. awarded on the different Manu- workman hip and cheapness of price will defy competition. Mr. P. H. Wheeler, the Superintendent of the Company, has been for many years engaged in developing watch making machinery, and the testimonials from his former employers testify to his business ability, skill, and integrity. The machinery of which the founders are possessed has been perfected under his superintendence. and a considerable part thereof is of his invention.

ed of ten thousand watches in various stages of Current Rafes completion which are the out-turn of the said machinery, and material on hand sufficient to turn out about twenty-five thousand more. I will thus be seen that it is not an untried plant which the founders have acquired, but one which has already given proof of its excellence. It was only the advantage of obtaining a cheaper labour market than can be found in the United States that has induced them to work the business in

It is an established fact that the principal factories in the United States in seven years paid 300 per cent. dividend on a capital of Six | des on required. Million Dollars; and that was done on a wage basis of \$1.50 (gold) per operative, the factories employing six thousand hands. If the difference & in the rate of labour in this country is taken into consideration the operations of the Company will be assured to realize to the full the expectations of the founders. The profits of watch making

It is not in the labour market only that an advantage will be obtained. Coal and other materials can be purchased in this country at a lower, rate than in the United States. And besides all these advantages, which ere great 2145 there is one of still greater importance, the knowledge to be obtained of the requirements of the local trade, of the trade for China, and that of "The Straits" and India. The Company will be capable of supplying a watch of the best workmanship to the population of these large and important countries at a price far below any

Taking into consideration these advantages. the founders confidently expect to pay a dividend of at least 10 per cent. per annum on the first two years' work and thereafter dividends at a much higher rate.

The Company has been registered in Hong: DOROTHY'S DOUBLE kong as a Limited Company.

The founders take and acquire 30,000 shares of the stock of the Company in payment for the machinery, plant, and stock and their labour and experience in preparing and procuring the maohinery and stock.
